### **DETAILED ACTION**

This Office Action is in response to amendments and remarks filed February 26, 2007. Claims 1-9 and 11-15 are currently pending.

#### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the series of annular regions alternating between diffuse, uniform illumination and light voids; the diffusers being front lit; a second location; and an inverse engineered illumination pattern must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next

Art Unit: 2878

Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 6-9, 11 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 7, 9 and 11, "objects under inspection" lacks proper antecedent basis.

Regarding claim 13, "electronic image information" lacks proper antecedent basis.

Regarding claims 6-9, it is unclear if the LEDs are the same as the LEDs claimed in claim 1 or not. Furthermore, it is unclear how the lighting elements are related to the LEDs claimed in claim 1.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1, 2, 5 and 11-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Cochran et al. (U.S. Patent 4,882,498).

Regarding claims 1, 2, 5 and 11-14, Cochran et al. disclose (see Figs.) a system

and method for providing illuminated fields within an automated visual inspection system, comprising: a patterned illuminator (10) configured to provide spatially-adjacent regions of uniform, diffuse lighting and lighting voids to produce engineered illumination fields; a receiver aperture (lens of a camera 36) positioned to receive light generated by the patterned illuminator which has scattered or reflected off a part under inspection (20); and a transport mechanism (conveyor) used to automatically convey and position parts under inspection within the engineered illumination fields generated by the patterned illuminator. Cochran et al. also disclose (see Figs.) a camera (36) and a processor (50), LEDs (10) and pulsing (48) as claimed. As understood, the lighting and lighting voids are alternating in an on/off manner, and the pattern created is a series of annular regions.

***Allowable Subject Matter***

6. Claims 3, 4, 6-9 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable once the 112 rejections are overcome and if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

7. Applicant's arguments filed February 26, 2007 have been fully considered but they are not persuasive.

Applicant asserts that Cochran et al. do not disclose spatially adjacent regions of uniform, diffuse lighting and lighting voids to produce engineered illumination fields. Examiner disagrees. As understood, since there is a pattern of LEDs and a diffuser

Art Unit: 2878

plate, diffuse lighting (where the LEDs are located) and lighting voids (where the LEDs are absent) are created as claimed. Applicant further fails to point out how the illuminator of the prior art does not disclose such fields.

Thus, as set forth above this rejection is proper.

### ***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
